Green Policy

What is the Green Policy?

With pollution being a major factor in not only China but the World's environment, we decided that it was best to become a step towards a solution instead of being a source of the problem.

The Green Policy is simple. When you book your *local move* with SAE Asia, part of the boxes we will provide will be used boxes, the other part will be new boxes (average 50% used, 50% new). All boxes are reevaluated for structural quality and appearance (any box that does not pass this test is recycled).

If the unpacking is not fully completed on the moving day (you may want to unpack by yourself), we will come back once you are done with the unpacking to collect the remaining boxes.

How does this help the environment?

With the Green Policy we can save about 900,000 kg of wood per year.

If just 100 customers use the Green Policy, our environment will save:

70 Trees

30,800 Gallons of Water

10 Cu. Yards of Landfill

180,480 KW of Energy

350 Gallons of Oil

260 Gallons of Air Pollution

&

STAND FOR TREES

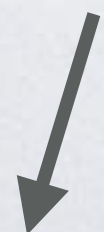

What about rainforests now?

At SAE Asia we 'Stand for Trees'. In addition to the Green Policy, SAE Asia will donate \$10 to 'Stand for Trees' for every move completed.

What does \$10 dollars do?

For every \$10 donated to the 'Stand for Trees' prevents one tonne of carbon dioxide from escaping into the air as a result of certain areas in the world that would otherwise cut down trees to support their local economy.

How much is a tonne?

STAND FOR TREES
